WEATHER OF CONCERN

Weather of Concern

- The National Weather Service advises that temperatures will begin to cool 10/18/17 Wednesday, dropping below normal by 10/19/17 Thursday.
- Models continue to indicate a weather system could bring widespread precipitation to Northern California 10/19/17 Thursday and 10/20/17 Friday.
- High pressure aloft will strengthen over Southern California bringing a warming trend through Monday. Mostly weak offshore winds will continue through today.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

***** VERY DRY air in place through Wednesday, with occasional N-NE/Offshore wind *****

***** Dry with strong S-SW winds for a few hours Thursday in NC06 and NC08 *****

High pressure will be overhead through Monday then move east. N-NE/Offshore winds will gust to 20-25 mph in wind-prone areas from the western Sierra slopes to the coast, primarily in the Sierra foothills and in the Bay Area, mainly during nights and mornings. Very dry air will remain in place, with daytime RH 5-15% and overnight RH recovery to 20-40% on mid and upper slopes and in breezy areas. Even with the high moving east, the dry conditions and N-NE winds will continue in inland areas through Wednesday, while a light onshore flow pattern begins to push cool humid marine air into coastal areas at lower elevations.

On Thursday a low pressure trough will move over the region. Clouds and S-SW winds will increase, and widespread rain is possible late Thursday through Friday. There will be a few hours on Thursday in the NE CA and Far East Side PSAs with dry conditions and strong pre-frontal S-SW winds gusting to 30-40 mph before higher RH and rain move in.

SOUTHERN CALIFORNIA

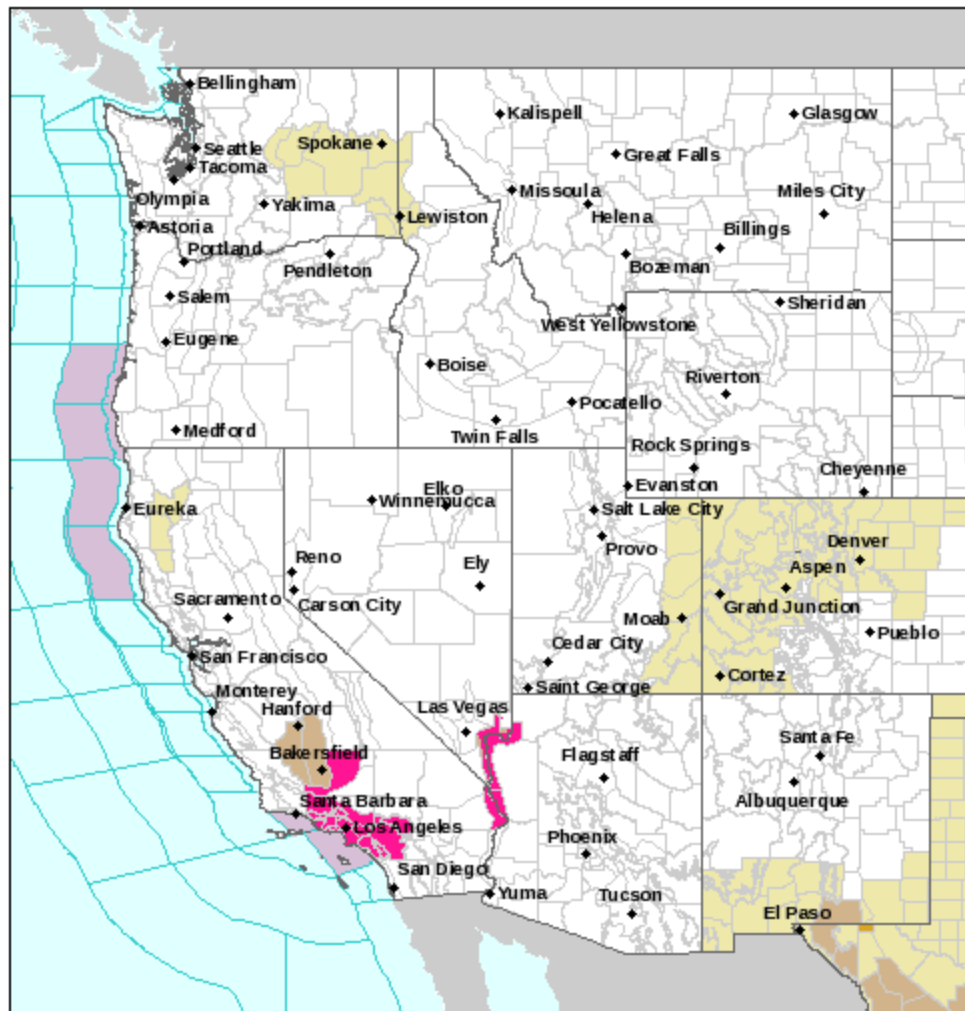

*****Gusty offshore winds across Southern California this morning*****

*****Very warm and dry through Wednesday*****

Northeast to east winds of 15 to 25 mph with gusts to 40 mph will continue to surface across the mountains and below the canyons and passes of Southern California this morning as surface high pressure remains over the Great Basin. Temperatures will continue to warm through Monday as high pressure aloft strengthens over California. Maximum temperatures will be in the mid 60s to mid 70s across the mountains, 80s in the Central California valleys, and 90s in the Southern California valleys today, with 70s to low 80s across the mountains, mid 80s to low 90s in the Central California valleys, and mid 90s to 102 in the Southern California valleys Monday. Temperatures will only cool a couple degrees away from the coast Tuesday and Wednesday as high pressure aloft only weakens a little. Minimum humidity will be mainly in the single digits and teens away from the coast through Wednesday. Winds will be light across the entire area this evening through the middle of this week. A Pacific trough will approach the West Coast Thursday and move inland Friday bringing significant cooling and a large increase in humidity to the region. Scattered showers with light rainfall totals will be possible Friday. Westerly winds of 15 to 25 mph with gusts to 40 mph will occur over the wind prone mountain and desert areas Thursday and then increase to 20 to 30 mph with gusts to 50 mph Friday.
